

NATIONAL TRANSPORT AUTHORITY

COMMUNIQUE

Updating of the National Transport Authority (NTA) Database

Further to this office Communiqué issued on 18 September 2018, it has been noted with much concern that owners of motor vehicles are still not producing their respective postal code while calling at the NTA Counters for transactions.

This is causing much difficulty to update the NTA data system. The public is therefore hereby informed that **as from Monday 12 November 2018, no transaction will be accepted by the NTA in the absence of Postal Code document** (which may be available at the Post Office).

The NTA will not be liable for any delays incurred by the public to complete any transaction necessitating the postal code by the NTA.

The NTA relies on the understanding and usual collaboration of the public.
